- ◆ Reduced Cost
- ◆ Reduced Waste
- ◆ Guaranteed Quality
- ◆ Globally Recognised

Fastint™

Mono Pigment range.

This range is for Gelcoat / Resin Manufacturers & Distributors wishing to pigment their products quickly and efficiently; it is available for Polyester, Epoxy, PU & PVC systems.

An economical way of making almost any shade including RAL, BS and other established colour ranges using 20 stock tinters.

A faster way of manufacturing products for your customer, with minimal investment. Fastint™ will reduce your stock inventory.

Scalable solutions available ranging from manual tinting through to a fully automated production facility.

Our **iMatch** online colour matching service can be used in conjunction with our Fastint™ Multi Polymer Mono-Pigment Range.
